BIG FIRE AT KOBE. Extensive Damage.

Shortly after 9 a,m. on Sunday, says a

Kobe contemporary of June 25, the "A godown at Wadnakicho, Hyogo, the premises of the Tokyo Warehouse Company, was found to be ablaze. When the fire was discovered the godown was entirely enveloped in flames. Fire brigades and police officials soon rendered assistance, and owing to their praisoworthy efforts the flames were got under at about 11.15 o'clock. The godown in which the fire originated, together with six small dwelling houses adjoining, wore totally destroyed and the stock of raw cotton contained in the godown was almost entirely burnt. The godown cover ed 300 taubo of land, and the six houses 80 tsubo. These buildings were insured with the Meiji Fire Office for yen 10,000, the cotton being insured with the same company for you 50,000. The cause of the fire is unknown, but the theory is that, while bales of the raw cotton were being thrown into the godown fire was caused by the concussion of the hoop iron binding one of the bales as it struck against the stone floor. The cotton must in that case have smouldered for some time and the fire was not discovered until it was too late to say either the goods or the buildings.

THE BOMBAY RUN.

Increased Japanese Activity.

The N.Y.K. are about to extend their service on the Bombay run by the addition of three steamers, which will make up nine vessels on that route, says the "Kobe Herald." There will consequently be a nine days' service between Kobe and Bombay instead of a fortnightly one, as heretofore. The point of departure has hitherto been Kobe but now that the service has been extended the steamers will leave Yokohama and Kobe on alternate sailing 2181 dates. The vessels leaving Kobe will make additional calls at Penang and Madras, Shanghai being omitted on the outward voyage. The regular ports of call are in future to be Hongkong, Singapore, Colombo and Bombay.

The vessels to be used on the Bombay line are as follows :---

Ryojun Maru (belonging to N.Y.K.) 4,806 Kagoshima Maru (do.)....4,405 Wakamiya Maru (belonging to Naval Totomi Maru Etoro Maru Takazaki Maru Eboshi Maru Moyoro Maru Kageshima Maru (belonging to Edami-

Total tonnage......36,721

THE EARTHQUAKE.

A city, teeming with life and joy is sud denly changed into a tomb-a living tomb, perhaps-by the exertion of the forces ofnature. And then we stand appalled at the magnitude of those forces, and look upon what has happened with wonder! Yet our daily life offers a spectacle quite as strange in imany respects, if less noticed, because we are more familiar with it. What wo cat and drink is changed by the alchemy of nature into bono and muscle, brain and nerve. If a proper drink be chosen, a form of liquid food, all the requirements of nature can be fulfilled. In Van Houten's Cocoa, for instance, one has a boverage that supplies the chemical laboratory of the stomach with all that it requires for the building up of a strong healthy body and sound nerves.

Smith: "Good morning, Jones. hear you have a son and heir." Jones: "Yes; our household now represents the United Kingdom,"
Smith: "How's that?"

Jones: "Why, you see, I am English, my wife's Irish, the nurse is Scotch, and the baby wails."

BEAUTY AND THE PICKPOCKET.

The "Japan Limes" says that a superb beauty, elegantly drossed, put in an aft pearance at the Isezaki-cho police station, Yokohama, recently and attracted the keen attention of all the men present. She asked the police to transfer the surveillance over her from Yokohama to Nagoya. The fact' is that she is a notorious woman, named Okin Fukuzawa, aged. 24, whose profession is to cheat gentlemen traveling by the Tokaido Railway, and the railway is her home. She has a lover who is a pickpocket, and on account of the chivalrous spirit with which, scoundrel as she is, she seems to be gifted, she is respected among the light-fingered gentry. Recently she was discharged from prison, and is still under the surveillance of the Yokohams police. She wants to proceed to Nagoya, where her lover lives. The police have not accepted the application, but railway passengers ought to be always cautious against being duped by this lady, whose beauty makes her a dangerous customer.

MAYOR SCHMITZ, OF FRISCO.

San Rhancisco, June 15. Schmitz applied to the Court on the 15th to be released on bail in order to enable him to continue his duties as Mayor in the event of his appealing against the conviction. His request was, however, rejected, and he has been placed in confinement. The Municipal Reform Party is making efforts to depose him from the Mayoralty, but he will not resign until judgment has been given by the superior Court. He is attending to municipal business in prison. New York, June 15.

Mayor Schmitz has been convicted on a majority of the counts in the indictment, but has lodged an appeal against the

Although until sentonce has been finally ... \$1.50 by Jerome K. Jerome \$1 50 pronounced and ratified by the Cout of last resort Schmitz will still continue in office as Mayor of San Francisco, pending his voluntary resignation or the expiry of his term, very little doubt is now entertain-1.50 ed as to the ultimate outcome of the proceedings, and the local political wire pullers .70 are already beginning to cast around for a likely successor. The consensus of opinion favours James Duval Phelan, who filled a previous term as Mayor of the city between 1896-1902, when, whatever his faults, he left a clean record as a man whose large 2.00 private means relieved him from the danger of pecuniary corruption. Ex-Mayor Phelan is only forty-six years of age, and a man of recognized culture and liberal views.

> Proud Mother: Everyone says that he's the very image of his father, and that he grows more like him every day. Cynicus, the Bachelor: Yes, I'm afraid he is a bit like him. But you needn't mind that so long as the child has good No doubt he'll grow out of it in

A WONDERFUL DISCOVERY.

This is the age of research and experiment, when all nature, so to speak, is ransacked by the scientific for the comfort and happiness of man. Science has indeed made giant strides during the past century, and among the—by no means least important—discoveries in medicine comes that of Therapion, particulars of which will be found in another column. This preparation is unquestionably one of the most genuine and reliable Patent Medicines ever introduced, and has, we understand, been used in the Continental Hospitals by Ricord, Rostan, Jobert, Velpeau, Maisonneuve, the well-known Chassaignae, and indeed by all those who are regarded as authorities in such matters, including the celebrated Lallemand, and Roux; by whom it was some time since uniformly adopted, and that it is westly the attention of those who requires uch a remedy we think there is no doubt. From the links of Arisfotle downwards, a potent agent in the removal of these diseases has filke the lanted philiosopher's stone) been the object of search of some hopeful, generous minds; and far beyond the mere power—if such couldever have been discovered—of transmuting the baser metals into gold is surely the discovery of a remedy so potent as to replenish the falling energies of the comfirmed **ous* in the one case, and in the other so effectually, speedily and safely to expel from, the system without the poisons of acquired or inherited disease mail their protean forms as to leave no thint or trace behind. Such is. The New French Remedy Theraplou, which may certainly rank with, if not take precedence of, many of the discoveries of our day, about which no little patentation and noise have been made. This is the age of research and experiment, wh alluature, so to speak, is ransacked by the scientific may certainly rank with, if not take precedence of many of the discoveries of our day, about which no little osteniation and noise have been made, and the extensive and ever-increasing demand that has been created for this medicine wherever introduced appears to prove that it is destined to cast into oblivion all those questionable remedies that were formerly the sole reliance of medical menters from the proprietor, and of the principal Chemists and Merchants throughout the Colonies, Iddia, China, Japan, &c., not even excluding such remote districts as Central Africa, the Fiji Islands, &t. THE PHILIPPINE ASSEMBLY.

Nor one among the Powers of to-day has had so much experience of colonising and ruling subject races as Great Britain. The historian of the future will remark that, while Great Britain, after the lesson of the War of Independence, was every ready to grant self government to Colonies in which the greater portion of the population was either British or European, she has consistently denied legislative institutions to protected races. America, which became a colonising Power yesterday, so to speak, decided to make the experiment in the Philippines of entrusting the Filipinos with some voice in their Government which is gradually increase until the ideal Government of Filipinos becomes an accomplished fact. The Legislative Assembly is to be preparation of the electoral rolls has just

the for making all things new. It is not to

the world in the government of tropical dependencies. The inference was evident. We were, in effect, notified that the British methods were obsolete and ineffective and we were invited to watch how the thing ought to be done. We have watched and we have learnt-many things to avoid. Also we have had impressed upon us the unwisdom that is shown by the perky youth who seeks, toginstruct his parent's maternal parent in the act of extracting the edible portion of an egg by suction. In all sincerity we advise the insular government to drop this foolishness of representative institutions and appoint a Com- their tell of human lives. As a conmission to investigate the methods sequence of the reports thus circulated adopted in British tropical dependencies. These methods are far from perfect but they seek perfection by the well-ordered road of practical experience. In this connection short cuts invariably lead into dangerous

CHINA AND ITS PRESS. the worst and most dangerous type. Accomping to the highest authority -which men have agreed to call Divine the love of darkness is a sign that deeds are evil. The witness is true in every sphere of human life and enterprise. To be averse to publicity in matters where the commonweal is deeply and directly concerned, as respects its relations with the administration of law and the establishment of justice and equity, is evidence that someth ing is rotten in the State. To take Russia for an object-lesson and model of her treatment of that well-nigh al powerful factor, the public press of the country, must needs mean for China humiliation and ignominy at the very outset, leading to issues fraught with conbeen completed. Education

From Fukien we learn that the ignorant superstitious populace in rural districts are the victims of designing agitators whose methods are eminently dangerous and wholly inimical to the public peace. connection with railway extension, evilly disposed and reckloss mon have ⁸pread reports calculated to inspire the utmost terror by working upon the religious fears of the people. Railway bridges, it is said, are structures requiring strength and solidity that can only be attained by the sacrifice of human victims, to the god or spirit of the bridge. Foundations have to be laid in blood and to ensure the success of their enterprise bridge builders will take special precautions have been taken by the people on many a country side to guard themselves from seizure to meet the demand for sacrificial victims and the proper authorities have had to resort to special proclamations is order to allay the fears of the people. The "spirit powder" risings thirty years ago and incidents like the Tientsin massacre should lead the authorities to suppress with the utmost rigour of the law the agitators of this

The German Mail of the 5th Jure was delivered in London on the 5th July,

Referring to the transfer of Sir Matthew. Nathan, K. C. M. G., Governor of Hongkong, to the governorship of Natal, Mr J. B. Suttor, New South Wales Commercial Agent in the East, writes in the course of a report to the Government of his State. "Australians are under a debt of ly captured by Raisuli, gratitude to Sir Matthew Nathan for the prompt measures taken in suppressing the most him personally, accompanied by only re-bagging of American flour and selling it four men as Australian. As a result of the prose cutions ordered I feel that the objectionable re-bagging process has been put a stop to for some considerable time."

. The following telegram has been received from the British Consul General Newchwang :-- Quarantine has been imposed against Hongkong.

A case of a nature which is fortunately rare in the Colony will be heard in the Supreme Court on Monday morning, before His Honour the Puisne Judge (Mr A. G Wise) and a jury of fifteen, to inquire into the mental condition of Ki Chit, gentleman, son of Poon Hung (deceased) and thew Nathan following in the footsteps of Poon Chan Shi, of Sai Chiu in the Namhoi so eminent and distinguished a Governo District. We understand that this is only as Sir Henry McCallum." the second case of its kind that has been heard in the Colony, a former case having been tried some fifteen years ago.

Two thousand nine hundred and eightypassengers (Chinese) left Hongkong yesterday as follows :- 350 for Java per Shan tung; 370 for Bangkok per Choi Şang 300 for Amoy per Hong Wan 1; 450 for Saigon per Quarta; 400 for Manila per Zafiro; 300 for Swatow per Devawongsi 250 for Moji per Kashima Maru; 180 for Swatow per Mason Maru; 200 for Saigon per Bourbon; 100 for Swatow per Haiching; and 80 for Hongay per Nikkai

THE RAJAH OF SARAWAK AS PAMPHLETEER.

A Remarkable Political Disquisition.

THE CRIME OF EMPIRE.

We received by post in the last mail copy of a pamphlet printed at the offices of is intellectual improvement, and "The Planet," says the Singapore "Free circulation of broad views on all subjects; Press." We are not aware whether this document was sent by the author, or by a friend, and it does not appear whether it is copyright, but the underial of the article is so remarkable, considering that it is written by the ruler of a country which has in times past acquired some of its territories such as Limbang by force, a ruler who however holds a unique position in regard to the acquisiton of his kingdom, and whose Far Eastern experience has been gained during a life of half a century spent here, that we take it to be almost a duty to reproduce the article in full, and commence

Querios

PAST, PRESENT, AND FUTURE. I write the following remarks with diffidence and some reluctance, though not without a certain confidence, based upon my long experience in the Far East, which dates back over fifty years, during which period I have had natives of mixed races continually around me mostly Mohammedans, amongst whom are some l look upon as being almost my best friends in the world.

I have thought deeply over the subject upon which I am now writing, and if I pass remarks which may appear wanting in respect to my King and country, I trust the gravity of matter may be my excuse for plain speaking.

I wish to point out that the methods of governing native races can never be a success so long as they tend to wars, and the killing of one another to become the rule rather than the exception.

It is something dreadful to contemplate, and yet too true, that nearly if not all of our magnificently built colonial towns and colonial developments of every description have their foundations upon the bones of the aborigines of the soil. One asks if the benefits bestowed upon their successors are sufficient to justify such sacrifices. I am fully aware that there are many occasions when bloodshed cannot avoided, and that a certain amount of severity is necessary in governing all races, white or dark, but as we rule at explanation, and their chiefs are unfocognist at Tls. 104 and Tls. 103, for the old and present I fail to see any hope of improved ed and ignored. Zulus: The same remarks now issues respectively. ment respecting the real elevation of the July, 10 to 12.30 200 yards Peak Range; natives by intellectual culture. If we look upon the sad side of the picture of the making of our immense Empire, we should duced, as we may say, to a condition are without change. pause a moment and ask if there will not little better than slavery. Boer-Land: Miscellaneous.—China Borneas have been future. Cements have good faith and loyalty of the people, cally pened in the world's history; for a justification been booked at \$164 and more are available and the world's history; for a justification been booked at \$164 and more are available and the world's history; for a justification are delibered. And they not mean anything or hothing? Are they not l generally got up, as I know they have been in many cases, by means of monoy supplied and remarks on the Boers. Gold-working fare wanted at 210% for the old ex new, and for interested motives, or as the Dutch and other reasons were mentioned as the late \$11 for the new issue with the first call send their police forward to order the "casus bolli," but the real one, I sincerely of \$1 paid. Repes have improved to \$221 Chineso to fire crackers when a Resident believe, was that, knowing the richness of laiyers, but shares are apparently still is approaching? Such displays are not the gold-fields, we desired possession of unprecurable. Watkins have declined to realities. Are we doing the right the country for British enterprise, and, 83 sellers, and Watsons to 811 after sales native races? Can no means be found brave, there was also jealousy of power, by which to endeavour to miso them as fitting inhabitants of the soil? Their language should be known, their customs carefully studied, and respect for their Members are notified that cash must be chiefs and for their own institutions, which may be useful, should be encouraged. All of them have some sort of history and cards, and in no circumstance can credit be tradition of their own. Or is their self pride so stamped out of them that it is useless to endeavour to mise them in their own estimation, and to instil self-respect as free-born men? If this could be done I feel sure they would be better subjects, and more reliable in every way. Our system of education is just the reverse of what it should be. -- We stuff natives with a lot of subjects that they don't require to know, and try to teach them to become like ourselves, treating them as if they had not an original idea in this rossession. An In- Chinese to work it, so how could the Supremo Court at Tientsin dismissed ed to a Ceylon planter and told by a writer dian Bishop a short time ago, writing in lives of a few hundred natives and Philipp's claim against the insurance in the "Times of Malaya": "One day I went ! the "Nineteenth Century," showed that the ideas of their infancy were born in taken into consideration as compared with caused the fire. them, and could not be cradicated and should be built upon rather than suppressed. I agree with him: Respect the native and his customs, and he will do the same to you. It is our fault, we do not teach them rightly. In the Philippines the Americans are making the same mistake, as Mr Alleyne ireland testifies, in

as good and as far advanced as those in England, which is sheer folly and non-Next to education comes treatment. in the British deminions sitting and giving telegraph system to withdraw some of the of the details of the coup detat in until I showed them where the elephant's than any European? Since the Boer War our pomp and "side" have been offensive to sober thinkers. Why now should we be deliged with flags, DAINS in the stom ch. o l'o and diar. Union Jacks, and pennants daugling over thoos are quickly relieved by the use churches, schools, and other edifices? Such Are those the right signs

brotherly, love and good will taught us by our forefuthers and by St. John ? Why put school-boys and those who come to pray under the emblems that stand for shot and shell? Is it not time enough when the boy becomes a man to let him choose his profession, warlike or otherwise? The military spirit should be held apart from the peaceful occupations of life, unless brute force is to be made the god of our destiny, which seems to be the object of the present day. What we really require but such nowadays is the second and not the first consideration, as it should be. Surely men can be loyal and good enough subjects without having so much drummers' claptup resounding around them

Lord Methuen's speech, October 14th,

Dover College :--"Do not let anybody say it was a mistake to teach the boy when he was young how to kill his enomy." I would rather have had a speech from Lord Methuen, whom I and admire so much, to tell the boy how to convert his enemy into a friend by reason and friendly bearing, rather than to teach him how to kill him by sword; but this, unfortunately, is the teaching of 'bepresent day, and influence the greater. \$760, at which rate small parcels have been number of the inhabitants of all denomina- fixed during the interval. Cantons have tions. Brute force is inculcated instead of been booked, and more shares are wanted, the milder method taught by the precepts at \$270. North Chinas have sold, and a raised is a "fausse route." It will, sooner Yangtszes have improved to \$175 with or later, rebound and be a curse on the buyers, and China Traders are still in

TELEGRAPH OPERATORS STRIKE.

NEW YORK, June 20. The union of employees of the Commercial Cable Company has for some time past outertained a grievance against the Company on the score of unfair discrimination against individual employees in the matter of pay and promotion, and recently aubmittod certain proposals to headquarters for fairer treatment. So far, however, these representations have been ignored, and at a late meeting of the committee of employees it was resolved to sanction a strike to compel acquiescence. It is expected. however, that the movement will not become general, and that it will be confined to the thertie senhand stations. Hopes are also entertained that a compromise will be effected before the strike assumes really serious proportions.

A NEW COMPASS:

Peter Peregrinus, who lived about 1260, understand to be the inventor of the pivoted mariner's compass. Many and notable are the improvements which since that date have been made in this all important aid to save navigation. Indeed, one might almost suppose that there was third chamber of the Supreme Court at little room for any new idea on the subject. Elbing has dismissed the case against the A spirit compass, which differs in one notable particular from other compasses, known to be a most unsuitable man to Fritz Trendel, and Mrs. Ella Trendel in has however, recently been devised by Mr

> As regards the need for this new compass, the inventor explains, that in these days of high speed steamers, where the compass is frequently placed well forward in the vessel, there is apparently a twisting motion of the ship as she makes her way through the water. This motion, together with the greater vibration experienced because of the forward position in which the steering compass is placed in fast modern steamers, has a disturbing effect on the compass card. To overcome this trouble Mr Debble has propared a spirit compass, the essential feature of which is the reduced size of the floating card in proportion to the diameter of the compass bowl. It is a well-known scientific fact that if a vessel containing liquid is subjected to motion, that motion is imparted to the liquid itself, the area of disturbance of the contained fluid being greatest at the sides of the containing yesael. The primciple of the new compass is that, by removing the periphery of the card further than usual from the inside surface of the bowl in other words, using a smaller card-greater steadiness will be obtained. Thus, by using a 7-inch card in a 10-inch bowl, and at the same time leaving a considerable space between the body of the float and the bottom of the bowl, it is claimed that a perfectly steady compass under all conditions is obtained. In regard to the distance of the eard from the "lubber's point" this is obviated by introducing a special "lubber line" in

proximity to the compass card.

It is known, principally from experience gathered on the trial trips of fast steamers overshallow water, that the bottom interfores with the free movement of the ship. which is steaming above. It is the same Does it pay to act the part of a good in the compass, and hence the need for a deep spirit bowl. In this new compass which is specially designed for fast mail torpedo-boats and fighting ships, tho card is of tale, suspended on a pivot of very hard metal, working in an agato cap. It is known that if the compass needles, which direct the card, are made of a greater longth, than, say, four inches, the needles may have the effect of inducing magnetism into the correcting globes placed on either side of the binnacle. To prevent not longer than four inches. This patent spirit compass, with its smaller card, will, wo understand, shortly be placed on the market. (Shipping Gazetto).
